Power BI - Slicers

Power BI

Slicers are Interactive Filters. Consider it an interactive visual filter to narrow down the data displayed in reports. Filter your charts, maps, reports, tables, etc. easily with Slicer. Slicers are another way of filtering.

Let us see how to create a slicer in Power BI:

Power BI - Select multiple values from a slicer

Power BI

In Power BI, we can easily select multiple values from a slicer using the CTRL + Click. For example: Select multiple states.

As an alternative, you can also set the multi-select option. We will see both the methods.

Let us see how:
