# POWER BI - GAUGE CHART

Amit Thinks 

## Gauge Chart - Example

A car speedometer is a classic example of a gauge chart. A gauge chart is a type of data visualization that displays a single value or a range of values relative to a specific goal or target. It typically consists of:

1. A circular or arc-shaped scale
2. A needle or pointer indicating the current value
3. Optional: color-coded zones or sectors to represent different ranges (e.g., speed limits)

A car speedometer fits this definition:

1. Circular scale: Showing speeds from 0 to maximum (e.g., 120 mph)
2. Needle: Pointing to the current speed

# Power BI - Create a Gauge Chart

Let us see how to:

- Create a Gauge Chart
- Format Visualization
- Change the Gauge Chart color
- Enable the Data labels (change the font, font color, units, etc., easily)
