Power BI

POWER BI - SET A CHART WITH A SLICER

PowerBI - Set a Donut Chart with slicer

Let us now set a chart like a Donut Chart with a slicer. Donut Chart is also known as a doughnut chart.

A Donut Chart is a pie chart that looks like a Donut. A donut chart, also known as a doughnut chart, is a circular graphical representation of data that displays how different categories contribute to a whole.

Features of Donut Charts

- Circular shape with a hollow center (resembling a doughnut)

- Segments or slices represent categories

- The size of each slice proportional to its value

- The total of all slices equals 100% (or the whole)
